Carbon Crystal Wall Heater ZXTj 500

ZXTj 500

ZONERGY

This product was awarded the national CCC compulsory product certification.

Carbon crystal heating plate applied secures rapid temperature rise.

The thermal insulation backplane material has a fire and flame retardant rating of A1.

The use of thermal radiator can bring a warm feeling like the warmth from the sun.

This product is a radiator integrating thermal heater and decorative painting in one piece.

| Technical parameters: | ZXTj 500 |
|-------------------------------------|---------------------------------|
| | Conventional parameters |
| Rated voltage | 220 VAC |
| Rated power | 500 W |
| Dimension (mm) | 1000*600*25 |
| Heating mode | thermal radiation |
| Heating material | Carbon |
| Flame retardant grade of the heater | Class A1 |
| Certification | CCC |
| Control mode | external temperature controller |
